SUMMARY

Frontend engineer with 2.5 years building production web applications in Vue.js, Nuxt, React, Next.js, and TypeScript. Shipped an AI product frontend, enterprise task and tenant management platforms, multilingual chatbot systems, and customer-facing e-commerce storefronts. Works across the stack from component architecture and state management to REST integration, SSR strategy, and Dockerised Node services.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks:	Vue 3, Nuxt.js, React 19, Next.js (App Router), Node.js, Express
State Management:	Vuex, Zustand, Context API
UI & Styling:	Tailwind CSS, Bootstrap-Vue, DaisyUI, SCSS, CSS Modules, Figma
Testing:	Jest, Vue Test Utils, Vitest, Chrome DevTools
APIs & Data:	REST APIs, Axios, authentication flows, i18n, file upload handling, MongoDB, MySQL
Performance:	SSR/CSR strategy, code splitting, lazy loading, caching, Lighthouse auditing, SEO
Tooling:	Git, Docker, Vite, ESLint, Prettier, Vercel, Netlify, Render, Postman, Jira, Agile

EXPERIENCE

Trigital Technologies Pvt. Ltd. — Hyderabad (Remote) Apr 2024 – Present

Frontend Engineer — CiteMentor AI (product team) Sep 2025 – Present

- Build the frontend for CiteMentor AI, an AI product under Trigital, delivering 20+ reusable Vue and React components and interactive UI features across web and mobile breakpoints.
- Cut initial bundle size by 35% through route-level code splitting, lazy loading, and dependency pruning, improving time-to-interactive on low-bandwidth connections.
- Partner with backend, design, and product to scope and ship features, handling API integration, dynamic data flows, and cross-browser compatibility.

Frontend Engineer — Client Platforms Apr 2024 – Sep 2025

- Built a Jira/ClickUp-style task and workflow tracking platform with Kanban boards, dynamic task cards, filtering, and user-based organisation across 6 dashboard views.
- Delivered a tenant management system and customer-facing Vue/Nuxt e-commerce storefronts covering product variants, search, cart, wishlist, checkout, and order workflows; Nuxt SSR lifted Lighthouse performance from 61 to 92 and cut product-page LCP from 4.2s to 1.8s.
- Shipped production chatbot systems with multi-step conversation flows, dynamic payload handling, session management, and i18n across 4 business domains and 3 languages.
- Designed in Figma and built the Trigital Technologies marketing site in Next.js, Tailwind CSS, and DaisyUI, reaching 95+ Lighthouse SEO and accessibility scores.
- Raised unit coverage on core Vue components to ~70% with Jest and Vue Test Utils, reducing regressions on shared UI during refactors.

PROJECTS

PDF Lab — Open-source PDF processing platform github.com/ChandrakantBudhalakoti/pdf-lab

Next.js 16, React 19, TypeScript, Express, Docker, qpdf, Ghostscript, ImageMagick

- Built a full-stack TypeScript monorepo supporting merge, split, compress, convert, watermark, lock, and unlock, pairing a Next.js frontend with an Express REST API.
- Hardened file processing by invoking qpdf, Ghostscript, and ImageMagick through Node child processes with safe argument handling to eliminate shell-injection risk.
- Implemented upload validation, rate limiting, CORS policy, and temporary file cleanup; containerised with Docker and deployed through an automated pipeline.

EDUCATION

Master of Computer Applications — Amrapali Group of Institutes, Haldwani (Uttarakhand Technical University) 2024

Bachelor of Arts — Kumaun University, Nainital 2022
